Personal Website

"A River cuts through rock not because of its power but because of its persistence" - James N. Watkins

Education

The University of Limerick

Bsc/Msc in Immersive Software Engineering, QCA – 4.0

Class Representative, 192/200 entrance submission

Limerick

2024-2028

St.Clements College

Leaving Certificate, Points - 625/625

School Captain, Valedictorian

Limerick

2018-2024

Experience

Induct

Co-Founder/IOS engineer

Dublin

Jul 2023 - Jul 2024

Induct is bringing the space of access management to the 21st century. Alongside four other people, founded the company. We incorporated as a Delaware C in America.

Detailed achievements:

- Learned investor relations through receiving investment of 100k which resulted in a 10 million valuation
- Received a 25K fellowship grant from Tyler Cowen
- Installed in 3 buildings across Dublin
- Current NDRC accelerator company
- - IOS development
 - Mobile Software:
 - React-Native Codebase
 - Typescript / Rust backend
 - Tailwind CSS
 - PostGresSQL
 - Front End:
 - Designed all mobile homepages in Figma
- Resigned my directorship of the company in July of 2024 to pursue personal development

Stripe

Software Engineering Intern

Dublin

Jun 2025 - Aug 2025

Intern on the Test Data infrastructure team, worked on Apache Spark data pipelines in Scala. Internship Project - PII detector for sanitized data

Awards

Career development grant, 2024: Received 5k in investment from Tyler Cowen to fund my immersion in the prominent American Tech spaces

Emergent Ventures Fellow, 2023: Received a \$25,000 research grant from Tyler Cowen to fund Induct

MongoDB Scholarship, 2025: Recipient of the MongoDB scholarship which pays for my college fees and additional expenses for outstanding ability in software engineering

National overall highest score in Leaving Cert Technology, 2024: In the 2024 Leaving Cert (ACT/SAT equivalent) I received the highest overall marks in Ireland for the subject of Technology

Merge Grantee, 2024: Received a 1k grant to build the third iteration of my robotic arm

YC AI Startup School, 2025: Hand picked and funded by YC to attend their 3 day AI conference in San Francisco

NASA Space Apps Hackathon Dublin Winner, 2023: Quantised a NASA Object Detection Model to allow it to run on embedded systems

Technical skills

Basic: Java, python, javascript

Intermediate: Typescript

Advanced: C, Rust, Scala, C++, Distributed programming, Ardupilot

Projects

Kepri Solar, 2025: Developing a SaaS platform that helps consumers maximize the financial return on their solar panels by optimizing battery charging and discharging based on real-time energy market data

6 Degrees of Freedom robotic arm, 2023 - 2025: Iteration 2: From scratch; designed and built a fully operational 6-axis robotic arm. Using an Arduino Mega as the control system and an app I developed to interface with the arm.

Breakthrough Maths Results, 2025: Freelance work I do. Built and maintained backend infrastructure to automate analytics reporting and results delivery via SMTP and SMS, Utilised the T3 Stack

QuoteBoat, 2025: Built a full-stack web app for students in the ISE program at UL to capture and share funny quotes and moments from lectures and campus life.

Twitter Productivity bot, 2024: Twitter productivity tracker - Using the twitter and conjure API, I built an automated bot that posts my daily productivity

Personal Website, 2024: Using React-Native, Typescript, Next-js, Figma and Tailwind I made a personal portfolio website

Leaving Cert Technology project, 2024: Programmed an Object Detection model to detect bears, further quantized the model to run on a RPI4. This project got the highest overall Mark in the country of Ireland for Leaving Cert Technology

Miscellaneous

Volunteering

General Sporting coach for those with disabilities

Limerick

Jul 2021 - Present
